SUMMARY

An intellectually curious and versatile engineer with experience building scalable **full-stack** web applications in **React**, **Python**, **Node**, **Typescript**, and **PostgreSQL**. I code with **Claude**.

LANGUAGES

English - Native Fluency

עברית - רמה טובה מאוד

EDUCATION

BOSTON UNIVERSITY, USA · B.S. Mechanical Engineering - 3.65 GPA (91%)

SIDE PROJECT

BLUE PINEAPPLE CHATAPP <https://bluepineapple.yony.io>

Local-first text and image / video messaging application with audio and video calling

Node / Express, React, Zustand, Postgres, Redis, Socket.io, WebRTC, IndexedDB, and Amazon S3

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER Unframe.ai · Tel Aviv, Israel

OCT 2025 - DEC 2025

- Built various UI flows in **Vue**, **Typescript**, and **Tailwind** in accordance with Figma specs
- Completed white-label **SSO / SAML2** integration feature in **Vue**, **Typescript**, and **Node**

SOFTWARE ENGINEER ASL Education Center · Framingham, MA, USA (remote)

JUL 2023 - FEB 2025

- ASL Survey: co-created a survey self-service tool in **React**, **Next.js**, **Typescript**, **Python Django**, and **Postgresql** designed around American Sign Language, including custom video navigation
- ASLA: developed portal for assessment proctors and school administrators to manage student data and our online ASL assessment in **React**, **Ruby on Rails**, **Postgresql**
- all projects built on top of **AWS ECS**, **ECR**, **RDS**, **S3**, **Terraform**, and **Docker**

SENIOR SOFTWARE ENGINEER Perry Street Software · New York, NY, USA (remote)

SEP 2022 - MAR 2023

- Consolidated varying **Redis cache** strategies using the **Singleton** and **Repository** design patterns and reduced code duplication and complexity in **Ruby** code
- Updated **background job pipeline** to handle profile photo moderation and re-sizing for both iOS and Android clients implemented with **message queues**, **AWS S3**, and **Amazon Rekognition**
- Added custom **unit testing** macros for **REST APIs** including documentation and **Swagger** support
- Built internal dashboards and admin pages in **React**, **Ruby**, and **Docker**

LEAD SOFTWARE ENGINEER Rentgrata · Chicago, IL, USA (remote)

DEC 2020 - JUL 2022

- started as a **Senior Software Engineer** working with **React**, **Ruby on Rails**, and **PostgreSQL**
- **promoted to lead engineer** in six months and co-managed six other developers
- regularly conducted code review, **authored user stories** with product team, and led design review
- implemented **integrations** for property management systems in **React**, **Typescript**, and **Next.js**

SENIOR SOFTWARE ENGINEER Tweddle Group · Detroit, MI, USA (remote)

OCT 2018 - SEP 2020

- supported Tracer application written in **React** and **Python**. Tracer is a vehicle diagnostic tool used by technicians to monitor electrical system on the manufacturing line in real time
- wrote custom **orchestration** and deployment tool to manage custom data packaging as well as OEM-specific release requirements in **Bash** and **Python**
- deployed all **AWS** as well as local envs using **Docker**, **Terraform**, and **Ansible**
- built IBM integration using **pub-sub message queues** (RabbitMQ) and **Scala**

SOFTWARE ENGINEER The Learning Center for the Deaf · USA (remote)

JUL 2016 - OCT 2018

- developed visual search engine in **AngularJS** and a **Ruby on Rails REST API** modeled around ASL specifically **designed for younger students who cannot use English** and text input
- **reduced report delivery time** of state-run assessments **from weeks to minutes** by converting legacy FMP data store to **PostgreSQL / Ruby on Rails**

SOFTWARE ENGINEER Paytronix Systems, Inc. · Newton, MA, USA

SEP 2014 - JUN 2016

- full-stack **Java** and **Scala** developer for **real-time OLTP transaction engine**, processing millions of restaurant loyalty transactions a month
- formerly "**big data**" engineer, developing **BI** tools, **data cubes**, and **ETLs** for **HDFS**
- built **ETL** in **Scala** combining restaurant loyalty transactions with check-level data in **Hadoop**
- rewired self-service **WYSIWYG** email tool written in **Javascript** and **Lift**
