

Yonatan Laurence

SOFTWARE ENGINEER

055-987-1188 yonatanlaurence@gmail.com

SUMMARY

An intellectually curious and versatile engineer with experience building scalable Full-stack web applications in React, Node, Python, Ruby, and SQL. Looking to learn more about Microservices, NoSQL databases, and Pub/Sub and Stream architectures. My favorite LLMs to work with are Co-pilot and Claude Code.

EDUCATION

BOSTON UNIVERSITY, USA

B.S. Mechanical Engineering - 3.65 GPA (91%)

TECHNICAL SKILLS

Number of years using:

React	2 years
Node	2 years
Javascript	4 years
Typescript	2 years
Ruby	4 years
Python	2 years

RECENT EXPERIENCE

SOFTWARE ENGINEER Unframe.ai · Tel Aviv, Israel

OCT 2025 - DEC 2025

- Implemented various UI flows in Vue, **Typescript**, and **Tailwind** in accordance with Figma specs
- Fixed misconfigured SAML2 / SSO support feature in Vue, **Typescript**, and **Node**
- Completed secure sign-in with session tokens and httpOnly cookies in **Node**

SOFTWARE ENGINEER ASL Education Center · Framingham, MA, USA (remote)

JUL 2023 - FEB 2025

- ASL Survey: co-created an online survey building tool in **React**, Next.js, **Typescript**, and **Python**
- Django designed around American Sign Language, including custom video navigation elements
- ASLA (ASL Assessment): developed portal for assessment proctors and school administrators to manage student data and our online ASL assessment in **React**, **Ruby** on Rails, and **Auth0**
- all projects involved **AWS ECS**, **Terraform**, and **Docker**

SOFTWARE ENGINEER Perry Street Software · New York, NY, USA (remote)

SEP 2022 - MAR 2023

- Consolidated varying **cache** strategies using the Singleton and Repository patterns and reduced code duplication and complexity by removing a dozen redundant implementations in **Ruby**
- Updated **ETL** pipeline to support portrait images in profile photos including backwards compatibility for both iOS and Android clients with background jobs and **message queues**
- Added custom unit testing macros for **REST APIs** including documentation and Swagger support
- Resolved geolocation errors for country-specific messaging platform affecting over 20 countries
